OBJECTIVE

Final-year B.E. student (SGPA 9.38) interested in building LLM-integrated applications, retrieval-augmented pipelines, and cloud-connected backend systems. Seeking an Applied AI Engineering internship to learn and contribute to AI-driven diagnostic and support workflows.

TECHNICAL SKILLS

Languages: Java, Python (used in AI/ML projects with LangChain, Transformers)

AI / GenAI: LLM Integration (OpenAI, Hugging Face Transformers), Prompt Engineering, LangChain, RAG Pipelines

Backend & APIs: Node.js, Express.js, REST API Design

Databases & Cloud: MySQL, MongoDB (Atlas), AWS (S3, IAM, SDK v3)

Tools & Fundamentals: Git, GitHub, Postman, VS Code, IntelliJ IDEA, OOP, Data Structures, System Design Fundamentals

PROJECTS

Ask About Me — Personal RAG Chatbot *Python, LangChain, FAISS, FastAPI*

- Built a retrieval-augmented chatbot that answers from a personal knowledge base (resume and project docs) instead of the model's raw memory, using a chunk, embed, retrieve, generate pipeline.
- Implemented similarity search over a FAISS vector store and exposed it through FastAPI endpoints; tuned prompts to reduce hallucination on out-of-context questions.

EnvVault — Full-Stack Secrets Management Platform *React, Node.js, Express.js, MongoDB Atlas*

- Built a MERN application (REST API + MongoDB Atlas) to keep environment variables and secrets for multiple projects in one place.
- Applied basic security practices: secrets hidden by default, uploaded files deleted after processing, and .env files excluded from version control.

EXPERIENCE

SDE Intern — Claidroid, Mumbai *Mar 2026 – Apr 2026*

- Built a Secure Cloud Storage Dashboard using AWS S3, Node.js and Express.js, with a REST API for file upload, retrieval and deletion.
- Used AWS SDK v3 to connect the backend to S3, handling asynchronous requests and returning structured error responses; the same patterns apply to integrating LLM APIs.

GSSoC Contributor — GirlScript Summer of Code *Aug 2025 – Oct 2025*

- Contributed fixes and documentation to 4 open-source projects; mentored contributors and reviewed submissions on my own project.

HACKATHONS & CERTIFICATIONS

- VerdictVision (**SIH**)— Legal Case Outcome Assistant, Smart India Hackathon (SIH) 2024; shortlisted at college level.
- **WWT All India Women's Hackathon** (2025)
- IBM SkillBuild — AI Fundamentals (2026)
- AWS Academy Cloud Foundations — AICTE × AWS (2026)

LEADERSHIP & COMMITTEES

- IEEE Co-Chair — I2IT Pune (2025–Present)
- Lady Representative — I2IT ACM Committee (2025–Present)

EDUCATION

B.E. Electronics & Telecommunication *Expected May 2027*

International Institute of Information Technology (I2IT), Pune — SGPA: 9.38
